DOMA TECHNOLOGIES

DX ENGAGE
SOFTWARE PLATFORM

DOMA's DX Engage platform is a robust Software as a Service (SaaS) solution that supports organizations in their Digital Transformation journey.

ABOUT DOMA DX ENGAGE

The DX Engage software platform is a highly customizable content services platform that allows for the capture, storage, and instant access of both digital and physical records. This scalable, secure platform leverages innovative technologies such as Intelligent Character Recognition, Artificial Intelligence, and Robotic Process Automation to simplify and automate business operations for organizations of any size.

DX Engage features include:

- *Document Merge and In-App Editing Tools*
- *API Integration to Your Other Applications*
- *Automated Redaction, Extraction, and Classification*
- *Managed User Access and Configurable Security*
- *OCR Powered Advanced Search*

RAPID DEPLOYMENT

As DX Engage is our proprietary platform, DOMA maintains a team of SMEs dedicated to the rapid configuration and deployment of the platform for our customers. With DOMA, full project deployment can happen in days and weeks rather than months.

ANY TIME, ANYWHERE

DX Engage is a cloud-based SaaS platform that is securely deployed in Amazon Web Services (AWS) Commercial or GovCloud to provide 24/7 access to your data from any location. Managed access, versioning, and collaborative editing tools mean your team can work together intuitively in DOMA's secure, centralized cloud platform.

ENDLESS INTEGRATION

We can help you leverage other platforms: DOMA's software integrates with other business-critical applications through REST API, SFTP, or standard file exports.

ORGANIZE & EXTRACT

Our Intelligent Document Processing tools extract data from structured and unstructured documents so you get the most out of your static content.

DOMA'S EDGE LAB

DOMAonline.com/edge-lab

"Innovate Fearlessly" is one of DOMA's core values. That's why we created The Edge Lab, our DOMA's US-based development team focused on rapid development and delivery of bespoke, cloud-native applications that meet a wide range of needs for your organization.

The Edge Lab has integrated several innovative capabilities within the DX Engage platform, including:

- Managed & Unmanaged RPA
- Digital Mobile Forms with Automated Data Processing
- eSignature Requests (via SMS & email) and Digital Signature Validation
- ICR Data Extraction, Automation, & Processing
- RESTful Data Transfer

WHY DOMA?

For over 20 years, DOMA has been an industry leader and trusted partner for Digital Transformation, Data Engineering, and IT modernization solutions. We. leverage the latest innovative technologies to develop holistic, digital solutions that empower people with technology.

DX MICROSERVICES

In addition to our DX Engage platform, DOMA provides a suite of microservices that delivers targeted solutions for your data. Our microservices work best when bundled with our powerful DX Engage platform, but can be leveraged on their own for lightweight solutions for your business challenges.

DX Autonomous
Identify data & automate routine tasks

eSignature
Simplify signatures on both desktop & mobile platforms

Reveal
Uncover insights from unstructured data

PinPoint
Extract handwritten & typed text from standardized forms

Redact
Easily protect sensitive data

Translate
Language detection and translation for up to 75 languages
