

DOMA

TECHNOLOGIES

Healthcare Information Services

DOMA is strategically positioned to support large, complex, mission-critical healthcare programs through technology-centered information management solutions.

Healthcare Customers Using Our Software & Services

Value Based Care Through Better Digital Data

DOMA has decades worth of experience working with leading healthcare organizations. Our customer base spans the Federal Government, hospital systems, private physician practices, and large payer/provider networks. We specialize in data and content capture, medical records review, and claims development and processing and have positioned ourselves as leaders in Protected Health Information (PHI) and Protected Health Information (PII) data compliance and security.

How We Can Help

DOMA's healthcare information services include medical records outreach, claims development and processing, and revenue cycle management. We are able to cut to the heart of complex problems and offer targeted micro-solutions that help make medical data more accessible. Whether you are still struggling with archives of paper files, or have transitioned to digital records, but need additional workflow support our expertly trained team can help your institution deliver faster claims processing, simplified records management, and ultimately better patient care.

THE PMR PROGRAM

The Veterans Benefits Administration (VBA) implemented the Private Medical Records (PMR) Retrieval Program to improve timeliness for the receipt of medical records in support of a Veterans' or Dependent of a Veterans' claim for disability benefits.

DOMA is responsible for retrieving, scanning, and processing Veteran's PMRs on behalf of the VBA. DOMA requests medical records from Private Health Care Providers (PHPs), converts them to electronic records, and submits them securely and electronically to the VA as evidence in support of a claimant's application for disability benefits.

The DOMA team employs their unique expertise in software based content and records management, along with their comprehensive claims processing experience, to improve the service and lives of our Veterans and their dependents.
