CORPORATE OVERVIEW

Federal Services

DOMA Technologies (DOMA) was founded in 2000 as a document management company focused on developing and delivering solutions through the internet. As the business environment has evolved and innovation has spurred change in the technology landscape, DOMA has remained committed to the power of the Cloud. Today, a considerable portfolio of government, healthcare, education, and commercial customers demonstrates that DOMA has the experience and infrastructure to deploy integrated solutions that make complex operations simple and meet the requirements of a wide range of federal agencies. DOMA specializes in creating holistic business process improvement solutions through a portfolio of offerings around Digital Solutions, Hyper Automation, and Cloud Services. The core of DOMA's business today is deployment of systems and services to automate the processes around data capture and extraction, machine learning, workflow management, predictive analytics, and cloud document storage. The processes, workstreams, technology, and analytics that drive over two decades of success has positioned DOMA as a trusted partner to the federal government.

These services, along with our DOMA Experience (DX) software platform, are designed to help support your organization's Digital Transformation journey. DOMA's DX platform is a secure, easy-to-use, Commercial-Off The-Shelf (COTS) product with a custom feel that meets ever changing project requirements. This proprietary platform is a SaaS solution architected on the Microsoft development platform and delivered through the Amazon Web Services (AWS) cloud framework. As a certified AWS partner, DOMA brings the unique expertise gained from 20 years of experience in software-based document management couples it with the infrastructure of the industry's leading cloud provider. DOMA on AWS gives federal customers more elastic options to expand, integrate other applications, or scale up without significant cost impacts.

CORE CAPABILITIES

DIGITAL TRANSFORMATION

- Data Engineering and Analytics
- Enterprise Content Management
- Business Process Automation

IT MODERNIZATION

- Agile Software Development
- Application Modernization
- Automation

CLOUD SERVICES

- Cloud Strategy and Migration
- Cloud Operations
- Anything-as-a-Service (XaaS)

SaaS Offerings

- Easily customizable cloud-based solutions

DOMA Technologies was founded in 2000 as a "cloud first" technology firm and is an AWS Select Consulting Partner and Public Sector Partner. DOMA has designed and deployed hundreds of customer application sites residing on AWS (including GovCloud) and has deep expertise with AWS and third-party services.

DOMA's offerings benefit from additional layers of security thanks to the AWS environment whose compliances and authorizations include:

DOMA's Engagement with the Federal Government

DOMA has been a trusted partner of the Federal Government since 2000. We built the company with a focus on people, innovation, technology, integration and deep desire to solve complex problems. Our Federal past performance runs the gamut from smaller specialized projects to high volume, complex engagements. Below is a select sampling of use cases where we have been a valuable partner with the Federal Government.

 Department of Veteran Affairs	PROJECT TITLE	SERVICE FOCUS	PROVIDED SOLUTION
Veterans Benefits Administration (VBA)	Private Medical Records (PMR)	Healthcare Information Management	Our conversion team facilitates the centralized ingest, workflow, and secure transmission of Veteran Medical Records. These digitized records allow for rapid retrieval in the outreach and claims development process.
	Electronic Mail Management Services (EMMS)	Digital Transformation	DOMA provides a cloud-based portal to support ingest from seven different modalities, application integration, application development in support of Veterans, their families, and their representatives.
Veteran Health Administration (VHA)	Patient Centered Community Care / VA Choice (PC3)	Healthcare Information Management	DOMA DX software platform serving as an ingest point and management mechanism for Veteran medical documentation and private provider artifacts.
VA Pittsburgh Healthcare System (VHA)	Financial Management	Digital Automation	DOMA DX software platform as well as off-site inventory management, scanning, indexing, quality control services of documents associated with the Finance and Research departments.
 Defense Health Agency			
Tricare	Medical Document Management	Healthcare Information Management	DOMA DX software platform for the secure receipt and processing of several different documents such as beneficiary enrollments, appellate cases, credentialing, and grievances.
United States Navy	Defense Occupational and Environmental Health Readiness System (DOEHR)	Public Health	Program management, system training, subject matter expertise, and technical support to the Navy and Marine Corps Public Health Center.
 Department of Defense			
Defense Finance and Accounting Services (DFAS)	Inbound Mail Handling	Digital Automation	Mailroom, Document Review, and Quality Assurance services facilitate the centralized retrieval, assembly, workflow, and secure transmission of 125+ different forms through our DOMA DX software platform.
 Department of Homeland Security			
U.S. Immigration and Customs Enforcement (ICE)	Document Imaging and Translation Services	Document Management	DOMA provides time-sensitive, secure scanning, data extraction and metadata tagging, and translation to English of foreign language documents for Homeland Security investigations.

Cloud Leader in Compliance & Security

Our team is constantly in risk assessment mode. Data breaches, data loss, account hijacking, insecure APIs, denial of service, and malicious insiders are at the top of the compliance and security list of concerns and we prioritize efforts to mitigate those risks.
