

# PROJECT PREVIEW

SERVICE  
LEADERSHIP  
COLLABORATION  
EXCELLENCE

Wayne RESA is a regional educational service agency that offers a wide range of services and support to the 33 school districts and 103 public school academies in Wayne County. We provide personalized support that is essential to improving student achievement and advancing educational outcomes throughout Wayne County. Our comprehensive range of services includes professional development for educators, purchasing services, administrative support for school districts, and much more.

“Wayne RESA is excited by the opportunity to work with DOMA Technologies. DX is a scalable and sustainable solution for Michigan public schools. Participating schools gain an affordable, committed and collaborative support model to drive digitization of analog data and accelerate the digital transformation of operations.”

- Kurt Rheaume  
Sr. Exec Director, IT Solutions

## WAYNE Regional Educational Service Agency (RESA)

### THE CHALLENGE

DOMA is partnering with Wayne RESA, Michigan’s largest intermediate school district, on a critical modernization project. DOMA will be helping Wayne RESA transition from an outdated, legacy system to cloud-based document management and automation. By centralizing Wayne RESA’s data and onboarding a variety of automation microservices, we will improve their level of support, lower administrative costs, and free up significant employee hours for their agency. Wayne RESA will also be able to reduce their dependence on in-house subject matter experts and re-allocate their efforts to more critical projects.

### DOMA’S CONTRIBUTION:

DOMA began this project after winning a competitive request for proposal (RFP) bid. Our demonstrated expertise in helping other public sector organizations and school districts, along with our unique intellectual property, sets us apart from other contractors. We have over 20 years of experience with state/local governments and education customers to modernize their information workflows. DOMA offers transformative digital transformation services and microservices that include:

- Intelligent OCR document conversion
- Digital, cloud-based, content management in our proprietary software - **DX Engage**
- Custom software & interface development
- eSignature solution
- Data workflow automation
- Automated extraction, redaction, & data insights

### LEVERAGE OUR COOPERATIVE CONTRACT

This competitively awarded contract enables other public municipalities, non-profit organizations, and school districts in Michigan to “piggyback” and purchase DOMA services on an “as needed” basis. This cooperative contract allows your organization to skip the lengthy RFP process and quickly leverage our competitive pricing.
